

G I L L E D E R M A N , M . D .

Just a brief note to tell you about our new, unique RADIOSURGERY NEW YORK Center in New York. Years ago, our physician leadership pioneered stereotactic fractionated brain and body radiosurgery, being the first to deliver fractionated non-invasive stereotactic body radiosurgery in the Western Hemisphere with probably the largest experience worldwide performing this precise treatment for those with primary and metastatic cancers. Radiosurgery often allows for more focused treatment of primary and metastatic cancers even after chemo, surgery or radiation has not produced the desired results.

Our years of experience with fractionated brain and body radiosurgery has been important and useful for many seeking non-invasive, outpatient treatment. Of course, it's not for everyone - that's why we seek to provide information to all.

We are located in the heart of Manhattan on Broadway and 38th Street- 1384 Broadway – just blocks from Penn Station, Grand Central Station, Port Authority, Times Square and Herald Square.

We have brought together a team with years of experience and dedication. Our highly sophisticated staff in the world of stereotactic brain radiosurgery, stereotactic body radiosurgery and prostate brachytherapy provides state-of-the-art oncology care.

In addition to stereotactic brain and body radiosurgery and prostate brachytherapy, RADIOSURGERY NEW YORK offers monthly seminars in an informal setting to discuss advances in oncology and radiosurgery data.

To arrange to meet Dr Lederman call us at 212 CHOICES. If you prefer to speak by phone first, ask for Dr. Lederman when you call- or just write him at GIL.LEDERMAN@RSNY.ORG

We also have weekly expert physician panels to evaluate films, reports and medical histories at no charge. New patient information brochures about our work are available just by calling or emailing. Topics include fractionated brain radiosurgery, fractionated body radiosurgery and prostate brachytherapy plus radiosurgery for prostate cancer. Additionally available is a new informative videotape and DVD which describes our technology and treatment techniques.

I would be happy to speak with you, correspond by email or meet with you, should you wish. To contact me or arrange an appointment, please call us at 212-CHOICES. My email address is GIL.LEDERMAN@RSNY.ORG

I invite you to use what is most convenient to you for continued follow-up on new clinical or medical concerns. Should you wish to seek care at RADIOSURGERY NEW YORK, we will work to provide a comfortable and confident atmosphere.

Sincerely yours,

Gil Lederman, MD
