

G I L L E D E R M A N , M . D .

April 30, 2008

Just a brief note to tell you about our new, unique RADIOSURGERY NEW YORK Center in New York. Years ago, our physician leadership pioneered stereotactic fractionated brain and body radiosurgery, being the first to deliver fractionated non-invasive stereotactic body radiosurgery in the Western Hemisphere with probably the largest experience worldwide performing this precise treatment for those with primary and metastatic cancers. Radiosurgery often allows for more focused treatment of primary and metastatic cancers even after chemo, surgery or radiation has not produced the desired results.

Our years of experience with fractionated brain and body radiosurgery has been important and useful for many seeking non-invasive, outpatient treatment. Of course, it's not for everyone - that's why we seek to provide information to all.

RADIOSURGERY NEW YORK is now located exclusively in Manhattan at Cabrini Medical Center in the Gramercy Park area - on 19th Street between Second and Third Avenues.

We have brought together a team with years of experience and dedication. Our highly sophisticated staff in the world of stereotactic brain radiosurgery, stereotactic body radiosurgery and prostate brachytherapy provides state-of-the-art oncology care.

In addition to stereotactic brain and body radiosurgery and prostate brachytherapy, RADIOSURGEY NEW YORK offers monthly seminars in an informal setting to discuss advances in oncology and radiosurgery data. The next two seminars are scheduled for September 22nd and October 7th, 2004 at 5:45 PM on the sixteenth floor of Cabrini Medical Center. You may call 212-995-6700 to reserve space at one of these seminars.

We also have weekly expert physician panels to evaluate films, reports and medical histories at no charge. New patient information brochures about our work are available just by calling or emailing. Topics include fractionated brain radiosurgery, fractionated body radiosurgery and prostate brachytherapy plus radiosurgery for prostate cancer. Additionally available is a new informative videotape and DVD which describes our technology and treatment techniques.

I would be happy to speak with you, correspond by email or meet with you, should you wish. To contact me or arrange an appointment, please call us at 212-CHOICES, or 212-995-6700. My email address is GIL.LEDERMAN@RSNY.ORG

I invite you to use what is most convenient to you for continued follow-up on new clinical or medical concerns. Should you wish to seek care at RADIOSURGERY NEW YORK, we will work to provide a comfortable and confident atmosphere.

Sincerely yours,

Gil Lederman, MD
